Section 1: Understanding Coffee - From Bean to Cup

This section forms the foundation of your barista training. A comprehensive understanding of coffee is paramount to becoming a skilled barista. We'll cover:

- **Coffee Bean Basics:** Different coffee bean origins (e.g., Arabica, Robusta), roasting levels (light, medium, dark),

and their impact on flavor profiles. Understanding these differences allows you to select the right beans for specific brewing methods and desired taste profiles. For instance, a light roast Arabica bean might be ideal for pour-over, highlighting its delicate floral notes, while a dark roast Robusta might be better suited for espresso, offering a bolder, more intense flavor.
