Frequently Asked Questions (FAQ)

Q1: What is the difference between a Sabre PNR and a ticket?

A1: A Passenger Name Record (PNR) is a unique identifier for a passenger's reservation within the Sabre system. It contains all the booking details, including flights, passengers, and special requests. A ticket, on the other hand, is the actual document that confirms the passenger's travel and grants them passage on the flights listed in the PNR. The PNR is created first; the ticket is issued from the PNR.

Q2: How do I troubleshoot a ticketing error in Sabre?

A2: Sabre provides detailed error messages. Refer to the error code and consult the Sabre documentation or your training materials for solutions. Common issues include incorrect fare selection, invalid passenger data, or connectivity problems. Contact Sabre support if you are unable to resolve the error.

Q3: Can I use the Sabre GDS for issuing tickets for different airlines?

A3: Yes, Sabre provides access to a vast network of airlines worldwide, allowing you to issue tickets for various carriers through a single system.

Q4: What are the security measures in place within the Sabre ticketing system?

A4: Sabre employs robust security measures, including encryption and access controls, to protect sensitive passenger data and prevent unauthorized access. Users are required to have unique login credentials, and their activities are monitored for security purposes.

Q5: What training is needed to effectively use the Sabre ticketing system?

A5: Sabre offers various training programs, ranging from introductory courses to advanced certifications. These programs cover all aspects

of the system, including ticketing, reservations, and other functionalities. Hands-on experience is crucial to master the system effectively.

Q6: How do I handle a passenger needing to change their flight after their ticket has been issued?

A6: Using Sabre, you would access the existing PNR, identify the flight needing changes, explore available options for rebooking, and process the change request according to the airline's policies and any applicable fees. The manual details the precise steps involved in this procedure.

Q7: What is the significance of the "fare construction" within the Sabre ticketing process?

A7: Fare construction refers to the process of combining different fare components to create a final passenger fare. Understanding fare construction is crucial for ensuring accurate ticket pricing and avoiding errors. The Sabre ticketing pocket manual provides detailed guidance on this important element of ticketing.

Q8: Are there any alternative GDS systems to Sabre?

A8: Yes, there are other major GDS systems, such as Amadeus and Galileo. Each system has its own functionalities and user interface. The choice of GDS often depends on factors such as cost, airline connectivity, and the specific needs of the travel agency.
