The success of any international investment law curriculum hinges on its potential to connect theoretical concepts with real-world applications. A textbook focused solely on abstract principles threatens leaving students ill-equipped to confront the nuances of actual disputes and treaty interpretations. This is where a compilation of cases and materials proves indispensable. By displaying real-life scenarios, these resources transform abstract legal concepts into understandable and relevant examples.

A well-structured collection of materials should commence with a robust foundation in the evolutionary context of international investment law.
