Q1: What is the difference between a factory service manual and an aftermarket repair manual?

A1: Factory service manuals are created by the vehicle manufacturer and offer the most detailed and accurate information. They contain specific specifications, diagrams, and troubleshooting procedures. Aftermarket manuals, like Haynes or Chilton, are more generalized and may lack the depth and precision of factory manuals. They're often cheaper, but may not cover every detail.

Q2: How do I identify the exact model and engine of my Mazda 323/Protege?
