Maintaining Your Husqvarna Viking Lily 555: Preventative Care and Cleaning

Regular maintenance is key to prolonging the life of your Husqvarna Viking Lily 555. This preventative maintenance will not only keep your machine running smoothly but also improve stitch quality. A clean machine is also a happy machine. Here's a breakdown of essential maintenance tasks:

- **Regular Cleaning:** After each sewing session, use a soft brush or compressed air to remove lint and dust from the bobbin area, feed dogs, and other accessible areas. This prevents build-up that could interfere with the machine's functionality.
- **Lubrication:** Refer to your **Husqvarna Viking Lily 555 instruction manual** (or online equivalent) for lubrication points and recommended lubricant. Proper lubrication reduces friction and extends the life of moving parts. Don't over-lubricate; a small amount goes a long way.

- **Needle Replacement:** Use appropriate needles for your fabric type. Regularly inspect and replace bent or dull needles to maintain consistent stitch quality. Dull needles can cause skipped stitches or damage fabric.
