Q2: My E90 320d is struggling to start. What could be the cause?

A2: Several factors can cause starting problems. Weak battery, faulty glow plugs (common in diesel engines), fuel delivery issues, or problems with the starter motor are potential culprits. Start with the simplest checks (battery voltage) before moving to more complex diagnostics.

Q3: What type of oil should I use in my BMW E90 320d?
