Using Your Philips GC8420 Garment Steamer: A Step-by-Step Guide

Proper usage is key to maximizing the lifespan and effectiveness of your Philips GC8420. Follow these steps for optimal results:

1. **Fill the Water Tank:** Ensure the steamer is switched off and unplugged before filling the water tank. Use only distilled or filtered water to prevent mineral build-up and extend the lifespan of your appliance.
2. **Plug in and Heat:** Plug the steamer into a power outlet and allow it to heat up. You'll usually hear a click or see an indicator light when it's ready.
3. **Choose Your Attachment (if needed):** Attach the brush attachment if you're steaming thicker fabrics or those with stubborn wrinkles.
4. **Begin Steaming:** Hold the steamer upright and keep a safe distance from the garment. Slowly move the steamer up and down, maintaining a consistent distance. Avoid lingering in one spot to prevent scorching.
