FAQ

Q1: Are HKCEE maths past papers still relevant for current exams?

A1: While the HKCEE is discontinued, the fundamental mathematical concepts tested remain relevant. The problem-solving skills and understanding developed through practicing these papers are transferable to current examinations. However, you should be aware that the specific curriculum and emphasis might differ slightly. Comparing the syllabus of past HKCEE exams with current exam syllabi is crucial.

Q2: How many past papers should I attempt?

A2: There's no magic number. The ideal number depends on your current understanding and the time available. Aim for a balance between thorough practice and avoiding burnout. Start

with a few papers to assess your strengths and weaknesses, then focus your efforts on the areas where you need improvement.

Q3: What should I do if I consistently get questions wrong on a particular topic?

A3: Identify the underlying concept you're struggling with. Review your notes, textbook, or seek help from a teacher or tutor. Practice more questions on that specific topic until you gain confidence and mastery. Don't move on until you fully grasp the core concept.

Q4: Are there solutions available for HKCEE maths past papers?

A4: Yes, many resources offer solutions and marking schemes for HKCEE maths past papers. These solutions are invaluable for understanding the correct approach and identifying any mistakes in your problem-solving strategy. However, try to attempt the questions independently first before looking at the solutions.

Q5: How can I improve my time management during past paper practice?

A5: Practice under timed conditions. Allocate time per question based on its marks and

difficulty. If you consistently run out of time, focus on improving your efficiency in solving questions, particularly in the areas where you are slower. Learn to identify and skip questions that are taking up too much time if necessary, returning to them if time permits.

Q6: Can I use HKCEE maths past papers to prepare for other exams like the DSE?
