Frequently Asked Questions (FAQ)

Q1: Is the AIP diet suitable for everyone with an autoimmune disease?

A1: While the AIP diet has shown promise for many, it's not a one-size-fits-all solution. Some individuals may experience minimal benefits, and others might need further adjustments based on their unique sensitivities and medical history. Consulting a healthcare professional or registered dietitian is crucial before starting any elimination diet, especially if you have other health concerns.

Q2: How long should I follow the AIP elimination phase?

Nutrient deficiencies are possible if not carefully planned, and some individuals may find it difficult to maintain long-term due to its limitations. Careful meal planning and potential supplementation under a healthcare professional's guidance is crucial.

Q4: Can I use the cookbook even if I don't have an autoimmune disease?
